Summary

As a seasoned Flutter mobile app developer leveraging Clean Architecture (MVVM) and Bloc state management to build dynamic UIs with native animations, I integrate Firebase for real-time data handling, push notifications, and offline caching to maximize performance and conduct thorough requirements analysis—authoring comprehensive SRS documents and modeling systems with UML (activity, sequence, class, and entity diagrams) to ensure every solution aligns with business goals.

Experience

Flutter Developer

Lumi.AI • Damascus
03/2025 - Present

- **PatternStock App:** architected the app with Clean Architecture (MVVM), built dynamic custom UIs, integrated Stripe for payments, enabled Firebase Cloud Messaging push notifications, and implemented offline caching for peak performance.
- **SAVI App:** applied Clean Architecture (MVC), created advanced filtering with custom widgets and a seamless search flow, added FCM push alerts, a wishlist feature, and real-time order tracking.

Flutter Developer and System Analyst

AWA Real estate Company
01/2025 - Present

- **AWA App:** I built AWA, a full-featured real-estate listing application—featuring offline caching and local data sourcing, push notifications, OTP authentication, and seamless e-payment integrations (Fatora, Syriatel Cash, MTN Cash)—enhanced with rich animations and successfully published to the market.

Systems Analyst

K&K Group • FreeZoon, Damascus
12/2023 - 03/2025

Skilled in analyzing and documenting system requirements to craft comprehensive SRS documents that align solutions with business objectives. Proficient in gathering stakeholder needs and modeling processes through activity, sequence, class and entity diagrams. Experienced in designing system architectures and data flows to ensure seamless integration across modules. Adept at communicating design artifacts and guiding development teams from requirements through implementation.

Flutter Mobile Apps Developer

K&K Group • FreeZoon, Damascus

07/2023 - 03/2025

- **KK ORDERS App:** Independently developed a mobile application for managing and organizing fabric order processing using Flutter and Firebase.
 - **KK GROUP WAREHOUSE Dashboard:** Built a responsive web dashboard in Flutter to manage fabric and goods inventory, linking warehouses with the central management hub and sales outlets.
 - **ZIKZAK App:** Delivered a Flutter and Firebase-based mobile app for handling clothing orders for customers, completed in one and a half months.
 - **KK GROUP E-COMMERCE App:** Currently developing an e-commerce application to showcase, sell, and promote the company's products.
-

Education

Information Technology Engineering / Software Engineering

Damascus University • Damascus

08/2024

Specializing in Software Engineering Bachelor's in Software Engineering and Information Systems
